Filing date: 03/20/2003

Art unit: 3751

Examiner: Tuan N. Nguyen

RE: Reply to non-compliant notice mailed to me on 2/08/2007

In order to avoid any confusion all the specifications are replaced, pages are marked on
the top as "Substitute Specification".

New page, Page 5, Response to the Restriction Requirement, the elected invention is the
bubbling system, capable to provide uninterrupted continuous stream of bubbles to cover
human waste in toilet bowl.

Abstract is provided with Replacement Abstract markings on the top of the page.

The substituted specification contains no new matter.

Amended specification and claim is signed as required.

No additional drawings are included, since they were already accepted and no changes
were made to drawings.

Entry of this amendment is respectfully requested.

Zoltan Egeresi, Inventor
